## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-35 and 67-101, drawn to a method of sequencing a nucleic acid molecule which is a single stranded DNA contained modified nucleotides, classified in class 435, subclass 91.2.
  - II. Claims 36-66, drawn to a method of sequencing a nucleic acid molecule without the modification of nucleotide of the nucleic acid molecule, classified in class 435, subclass 91.2.
  - III. Claims 102-109, drawn to a method of producing a nucleic acid molecules with reduced secondary structure, classified in class 435, subclass 91.2.
  - IV. Claims 110-143, drawn to a method of sequencing a double stranded nucleic acid molecule, classified in class 435, subclass 91.2.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I- IV are distinct, if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, although the different inventions are all drawn to the methods of sequencing nucleic acid molecule, the different inventions involve different method steps, for example, group I, claims 1-35 and 67-101 involve using a single stranded nucleic acid with the modification of nucleotide of the nucleic acid for sequencing, group II, claims 36-66 involve using a single stranded nucleic acid molecule without the

modification of nucleotide of the nucleic acid molecule for sequencing, while group IV, claims 110-143 involve a double stranded nucleic acid molecule for sequencing. Group III, claims 102-109 are drawn to a method of producing a nucleic acid with reduced secondary structure involving using a complementary pair of precursors. Therefore, they have different modes of operation, different functions, or different effects. Thus, they are different inventions.

3. A telephone call was made to Ms. Brenda Jarrell on 10/23/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is 703 (305) 7112. The examiner can normally be reached on Monday - Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 703 308 1119. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 (308) 0196.

Joyce Tung 7. 7 November 3, 2003
